ASX Code: DME

30 October 2020

ACTIVITIES REPORT FOR SEPTEMBER QUARTER, 2020

Activities onsite at the Company's projects in Fiji continue to be in effective suspension due to restrictions imposed in response to the COVID-19 pandemic. Travel from Australia to Fiji is not permitted and there is little the local Fijian staff can do at present without supervision and involvement from Australia.

The Company's resource estimation consultants in Australia have advised Dome that their 2020 revision of the Sigatoka JORC 2012 mineral resource estimate is now complete and they will be ready to present the results to the Company in the near future. It is anticipated that a summary of the key outcomes of this new work will be available for inclusion in a report to shareholders in November, 2020.

Once those results are to hand Dome will be in a good position to select the most relevant site or sites for collection of the bulk sample at Sigatoka that is needed for resumption of the definitive feasibility study. It is expected that the Southern Kulukulu area, near the Sigatoka River mouth, will feature prominently in the new results and that this area will then be a prime target for bulk sampling. It was noted when this area was being drilled earlier this year that visually it was distinctly richer in heavy minerals than the average at Sigatoka. The new resource work to be reported soon will quantify this visual observation.

It is encouraging to note that the international benchmark iron ore price (for 62% Fe) continues to trade in the \$US115-120 per tonne range.

CORPORATE

Expenditure incurred on exploration and related activities during the September 2020 Quarter totalled \$34,886.

Payments to related parties of the entity and their associates during the September 2020 quarter totalled \$54,000 which comprised directors' fees and superannuation.

As at 30 September 2020, Dome held \$6,386 in cash.

For further information about Dome and its projects, please refer to the Company's website [www.domegoldmines.com.au] or contact the Company at (02) 8203 5620.

This announcement has been approved by the Board of Dome Gold Mines Ltd.

G G LOWDER
Chairman

COMPETENT PERSONS' STATEMENT:

The information in this report that relates to Sigatoka, Ono Island and Namoli-Wainivau is based on information compiled by Garry Lowder, who is Chairman of the Company. Dr Lowder is a geologist who is a Fellow of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Lowder holds shares in the Company both directly and indirectly and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

ABOUT DOME

Dome is an Australian mining company, which listed on the ASX on 22 October 2013. The Company is focussed on gold, copper and iron sands in Fiji, where it holds three highly prospective exploration tenements. The Company's objective is to become a major force in the mining industry of Fiji by the discovery and development of mineral resources within its Fijian tenements.

Sigatoka is an iron sand project containing abundant heavy minerals, principally magnetite, with subordinate ilmenite and traces of rare earth minerals and gold. Drilling to establish an initial resource estimate for the project was completed some time ago. A substantial upgrade to that initial resource was completed in 2019. New drilling, which finished in early April, 2020, is expected to upgrade the resource base further when results have been incorporated into the resource estimation process. Commencement of production at Sigatoka by the use of sand pumps and later by conventional dredging and wet processing is anticipated within two years.

Dome's other projects are the Ono Island epithermal gold project, where an initial exploration diamond drilling was completed in early July 2018, and the Namoli-Wainivau porphyry copper-gold project, where additional exploration programs are expected to take place at a later date.

Dome's Board and Management team has a high level of experience in Fiji, and Dome has been actively exploring in Fiji since 2008.

**DOME GOLD MINES LTD
 TENEMENT SCHEDULE**

Tenement	Name	Holder	Interest %	Area (hectares) as at	
				30 September 2020	Expiry Date
SPL 1451	Ono Island	Dome Mines Pte Ltd	100	3,028	24/06/2023
SPL 1452	Namoli-Wainivau	Dome Mines Pte Ltd	100	33,213	26/08/2022
SPL 1495	Sigatoka Iron sand	Magma Mines Pte Ltd	100	2,522	10/02/2022
